Flush wood garage doors to match traditional and contemporary style homes

Model 40 double-flush wood garage door.

*Model 43 rough-sawn cedar hardboard*

With their wide selection of styles, windows and accents, our flush style wood doors complement both traditional and contemporary exteriors. Quality materials and expert craftsmanship give your home an appealing appearance that's easy to live with for many years.

# Models 40-47

## Flush Wood Doors – So popular because they're so versatile.

### Crafted in first class tradition

Wood flush doors offer several distinctive exteriors to personalize your home. Shiplap construction minimizes air infiltration for all doors, and some have built-in insulation. All kiln-dried hemlock, sitka spruce or equal frame structures are hand assembled. External panels are pressure-bonded to framework with high-strength, waterproof adhesive.

### Dimensions

(Stile/rail dimensions are face measurements and do not include the molding.) All dimensions are nominal.

| Model | Exterior                             | Interior                        | Insulation                | Frame  | Total Thickness | Printing             |
|-------|--------------------------------------|---------------------------------|---------------------------|--------|-----------------|----------------------|
| 40    | 1/8" Hardboard                       | 1/8" Hardboard                  | Polystyrene, 4.75 R-Value | 1-1/8" | 1-3/8"          | All Sides, Standard  |
