Harvey Aluminum Enclosure System

features & benefits

- 1-1/8" aluminum wall system
- Custom manufactured to fit most applications, with widths to fit any size structural layout
- Heights to 102" with limitations
- Includes all mounting channels and screws
- Matching storm door and hardware
- Interchangeable glass and screen or self-storing style available
- Available in white, almond or bronze baked enamel finish
- Ten year warranty
- Economical way to close in a porch
- Protection from harsh weather and insects
- Extended enjoyment of the seasons -- brings the outside, in!

Panels with interchangeable glass/screen option

Hollywood

Hi-Lite

Panels can be customized on kick plate heights

Panels with self-storing glass option

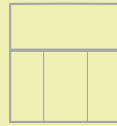

Horizontal rolling storm window

Both sash operate on DuPont Delrin wheels with full screen

Tru-Channel storm window

Both sash are removable with lower sash ventilation; panels can be customized on kick plate heights

While Harvey Aluminum Enclosure Systems are designed to provide ventilation and protection from insects, they are not completely weatherproof and therefore are not intended for prime living areas.

Harvey Classic Carport/Patio Cover

features

- Incorporates the Classic Patio Room 4" roof system
- Wall mount channel, side fascia, gutter fascia
- Aluminum structural support system pre-finished white
- All fasteners and caulking for normal installation
- Can be converted later into a patio room with optional wall panels
- Ten year warranty

product uses

- Cover over existing deck to protect outdoor items from exposure to sun and inclement weather
- Mount to side wall of house to protect:
 - Compact car
 - Small boat
 - Outdoor equipment
 - Pop-up camper
 - Riding lawn mower
 - Tools

As an alternative to garages, carports are a valuable, economical addition to your home and help cover your important possessions. Protect your automobile, or create an outdoor living space protected from sun, rain or snow.
