Signature

Double Hung Replacement Window

Signature features

The Harvey Signature is a premium replacement window, offering a distinctive angled master frame and heavy walled construction throughout, perfect for oversized openings. Designed for a lifetime of worry free performance, the Signature line combines strength and beauty in a window system ideal for residential installation, yet tough enough for light commercial applications.

- ENERGY STAR® qualified with optional Low-E/Argon glazing
- Top and bottom sash tilt-in for easy cleaning
- Ventilation limit latches that keep top or bottom sash partially open
- Factory calibrated constant force balances never need adjustment or lubrication
- Reinforced at meeting rail and cam action lock for outstanding strength
- Locking fiberglass half screen
- Color matched hardware with Brasstone and Brushed Nickel optional

The Signature offers heavier gauged vinyl to support larger residential openings or light commercial applications.

Thermal Performance Double Hung Signature with Welded Sash & Mechanical Frame

Glazing	U-Factor	R-Value	SHGC	Visible Light Transmittance	ENERGY STAR Compliance
Clear	0.48	2.08	0.56	0.59	---
Low-E	0.36	2.78	0.28	0.52	NC, SC, S
Low-E/Argon	0.33*	3.03	0.28	0.52	All Zones
2X Low-E/Argon	0.33*	3.03	0.26	0.46	All Zones
Federal Incentive Package†	0.30	3.33	0.20	0.46	All Zones

*.35 U-Factor or lower are ENERGY STAR qualified in all 50 states. For structural performance values and other product specifications, visit harveybp.com

†Signature windows can qualify for a federal tax credit under The American Recovery and Reinvestment Act of 2009. For the latest program guidelines and qualifications, please visit harveybp.com and consult a tax professional..

U-factor measures the rate of non-solar heat transfer from one side of the window to the other. Heat transfer implies both heat loss out of a living space during cold weather and non-solar heat gain during hot summer months. The lower the U-factor, the better the performance.

R-value measures the resistance of a glazing material or fenestration assembly to heat flow. A high R-value window has a greater resistance to heat flow and a higher insulating value than one with a low R-value.

Solar Heat Gain Coefficient (SHGC) measures how well a product blocks heat from the sun. The lower the SHGC, the better a product is at blocking unwanted heat gain.

Visible Transmittance (VT) measures how much light comes through a product. The higher the VT, the more light that comes through.

About Harvey Building Products

Harvey has built a solid reputation as a leading manufacturer and distributor of quality building products. A family-owned and operated business with over 45 years' experience, Harvey Building Products is known for outstanding craftsmanship and superior service as well as standing behind every product we make. In addition to manufacturing durable, attractive windows, doors and patio rooms, Harvey distributes a full line of highly respected building products to professional contractors and builders throughout the Northeast.

We understand what it takes to be part of your home.™
